

## Preface to the Master Index of Declarations of Originality

This Master Index constitutes a sovereign record of originality in the development of the Energy Cycle (EC) framework.

Each declaration is issued unilaterally and with full authority, grounded in logical analysis, forensic investigation, and causal reasoning.

The purpose is not to seek external validation but to establish an independent lineage of thought — one that redefines the mechanics of the cosmos without reliance on inherited assumptions.

Where the Standard Model and its derivatives invoked metaphors and conjectures, the Energy Cycle restores physics to its foundations: energy/mass density, thermodynamics, and time.

Each declaration therefore serves as both a marker of originality and a record of sovereignty — affirming that cosmology can be reclaimed from abstraction and returned to causality.

## Master Index of Declarations of Originality
